Patrick OConnor

Full Stack Developer

I'm Patrick O'Connor, an Ivy League educated lawyer & moderately-proficient git user. I have been "writing code" for several years, first as a hobbyist and, more recently, as a student in General Assembly's immersive web development course. I am currently seeking employment as a junior developer.

💼 EXPERIENCE AND PAST EMPLOYMENT

Developer in Training
2016 - Present

General Assembly - Boston, MA

I am currently in the final weeks of this intensive crash course in full-stack web development. Over the past 12 weeks, I've immersed myself in the modern web stack and the tools and techniques of professional software development

In the process, I've grown significantly as a developer. Building applications using novel languages and frameworks in collaboration with my peers and with the guidance of my instructors has opened my eyes to higher level concerns like design patterns and programming paradigms and allowed me to take a more methodical approach to every programming task. Perhaps more importantly, it has forced me to:

- Understand Git and not fear merge conflicts.
- Write organized, semantically expressive code that is intended to be read by another human.
- Observe code formatting conventions.

Document Manager
2015-2016

Middlesex Recovery - Woburn, MA

Managed digitalization of medical records.

Ski Instructor
2014-2015

Vail Resorts - Vail, CO

Taught group and private ski lessons.

🚀 SKILLS & PROFICIENCY

Backend JS	Node Express MongoDB WebSockets Mocha/Chai >
Frontend JS	jQuery React Redux D3 Ember
Other	Ruby on Rails PostgreSQL Electron (JS-based desktop applications)
Automation	AppleScript JavaScript for Automation AutoHotKey
HTML/CSS	HTML5 SASS SVG
Dev Skills	Git Github
Dev Skills	Advanced Research and Writing
